Step for Dogs

OT LLC introduces Twistep, a pet access and health improvement steps that assists in the loading and unloading of dogs into the

rear cargo area of sport utility vehicles, mini-vans and other vehicles with high cargo floors. The step

weighs 18 pounds and is constructed of welded steel with a durable coating that resists corrosion. It attaches with a hitch pin that, when removed, permits easy removal of the step and allows user to access the hitch for other uses. When not in use, Twistep stores under the vehicle bumper.
